

VM6062

6U VME Server-Class Blade Computer Designed for intensive Data I/O Processing

- ▶ 2-Core 2.2 GHz Intel® Xeon® Processor D-1500 Product Family
- ▶ Up to 32 GByte DDR4 on-board soldered memory with ECC
- ▶ Dual 1 Gb Ethernet, USB 3.0, HDMI, COM ports on front
- ▶ Dual PMC/XMC, Dual M.2 and mPCIe sockets
- ▶ Extended Life Cycle and Silicon Reliability

POSSIBILITIES START HERE

VM6062

A unique fully fledged I/O Blade Server PC

The VM6062 is a low power 2-Core/4-thread Intel® D1508 version of a pin compatible 6U VME SBC products range featuring a processor from the Server Class Intel® Xeon® Processor D-1500 family.

The VM6062 is a unique fully fledged I/O Blade Server PC as it features on the front panel HDMI, USB 3.0, COM and Dual Gigabit Ethernet ports aside the PMC/XMC slots.

FIELD PROVEN AND OPEN TO MIGRATION ARCHITECTURE

The VM6062 features an Intel® Xeon® Processor D-1500 family processing unit already deployed in the field of applications ranging from the Telecommunications, Industry, Transportation and Defense on Kontron products such as High Performance VPX platforms, CompactPCI Blades, COM-Express modules and SYMKLOUD servers.

TECHNOLOGY REFRESH CAPABILITY

The close pin compatibility of the VM6062 SBC with former Kontron 6U VME products such as the VM6050, VM6052 and VM6054 makes the VM6062 as a good candidate for both the expansion and the performance leveraging of existing programs.

HIGH VERSATILITY AND CUSTOMIZATION

The I/O expansion options provided by the VM6062 makes this product suitable to fulfill a large range of applications. In addition to the Two Gigabit Ethernet interfaces, three USB links, two SATA interfaces, two serial lines, one HDMI and up to height GPIO

available on the base version, the VM6062 features the following I/O expansion possibilities:

- ▶ Two PMC/XMC slots
- ▶ Two M.2 slots
- ▶ One miniPCI Express slot as exclusive use of one PMC/XMC
- ▶ PCI Express® x4 expansion on high performance UHM P0 connector compatible with V2PMC2 carrier card.

UP-TO-DATE DIGITAL SECURITY ENABLED PLATFORM

Digital security is of tremendous importance for embedded computing: the exploding number of deployed autonomous devices with no operator close by will represent a significant surface of attack. Moreover, embedded computers can be connected and active in the field during many years.

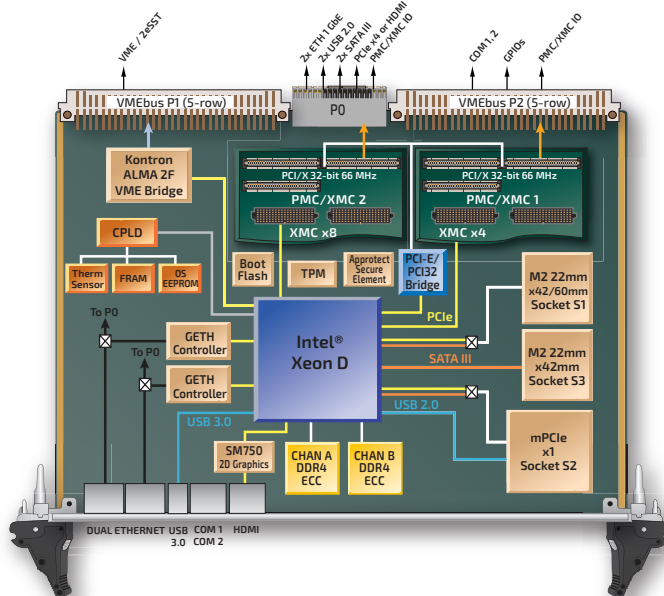

Kontron answers digital security requirements in the frame of the SEC-Line offer with hardware enforced root of trust (Dual secure elements) which are available on the VM6062, and software only techniques such as Secure Boot.

Furthermore, the design of the VM6062 already includes the host a third secure element to enhance digital security of the application.

Long Term Supply and Support

The VM6062 is part of the Kontron Extended Life Cycle product family which offers a 15-year minimum life cycle organization on top of Intel® embedded product line silicon life cycle. And extended long term support achievement is render simple choosing among a set of catalog support packages.
